

Endpoint: <http://localhost:8080/delivery-fees>

This endpoint enables other parts of the application to request delivery fees

Request

The following input parameters can be specified in the request:

Parameter	Type	Required	Description
city	string	yes	The City where the delivery will take place.
vehicleType	string	yes	The type of vehicle to be used for the delivery.

Supported values

The following values are the supported values for the input parameters:

Parameter	Possible values
city	Tallinn, Tartu, Pärnu
vehicleType	Car, Scooter, Bike

Response

If the request is successful, the endpoint will return a JSON object containing the total delivery fee and if there is an error, an error message will be returned.

Example

Here's an example of how to use this endpoint:

Request

```
GET http://localhost:8080/delivery-fees?city=Tallinn&vehicleType=Bike
```

Successful Response

3.5 €

Request

```
GET http://localhost:8080/delivery-fees?city=Tallinn&vehicleType=Bike2
```

Error Response

Vehicle type not found
